

Privacy Policy for The StormTracker Project

Effective Date: May 26, 2026

1. Introduction

Welcome to StormTracker. We are committed to protecting your privacy and ensuring your data is handled securely and transparently in accordance with global data protection standards, including the Nigeria Data Protection Regulation (NDPR).

2. Data Collection and Telemetry

When you interact with the StormTracker Telegram bot, we collect the following data:

- **Identity Data:** Your Telegram User ID, Username, and (if provided during onboarding) your real Full Name.
- **Conversational Data:** All text messages, commands, and interactions sent to the bot.
- **Media Data:** Images and documents uploaded to the bot. These are processed ephemerally in RAM (Base64) and are not permanently saved to our hard drives.
- **Metadata:** Cryptographic vectors (mathematical representations of images) and device timestamps extracted from screenshots to prevent duplicate submissions.

Important Warning on Telemetry: StormTracker utilizes advanced observability tools (Langfuse) to monitor AI performance. **All conversations with the bot are logged in plaintext and are visible to the System Administrator.** Do not share passwords, financial data, or sensitive personal information with this bot.

3. Tenant Isolation and Data Access

StormTracker operates on a strict multi-tenant architecture to protect user privacy:

- **Public Users:** If you are not an onboarded member of the "Mighty Storm" music group, you are classified as a "Public User." Your performance metrics and identity are mathematically excluded from all group analytics. Group Administrators have zero access to your data or analytics.
- **Mighty Storm Members:** If you are verified as a member, your performance metrics, submission timestamps, and full name are compiled into daily reports visible to designated Group Administrators to facilitate musical mentorship. Administrators cannot read your private chat logs with the bot.

4. Third-Party Data Processors

To provide artificial intelligence capabilities, your data (including anonymized text and images) is securely transmitted via API to third-party processors, including Google (Google AI Studio) and OpenRouter.

5. Age Restrictions

You must be at least 13 years of age to use this service. We do not knowingly collect personal data from children under 13.

6. Your Rights and Data Deletion

You have the right to access, rectify, or erase your personal data. To exercise your "Right to be Forgotten" and request the complete deletion of your identity, conversation history, and performance metrics from our database, please contact the System Administrator at: israelanuoluwaposimi955@gmail.com.
